Objective	<p style="text-align: center;">Project Lead/Project Manager</p> <p>To explore the challenging field of software engineering & establish a successful & satisfying career in it.</p>
Professional Profile	<ul style="list-style-type: none">• Experienced Project Manager who has successfully led large project teams of 11+ people from requirements gathering to implementation & support. Excellently handled internal conflicts between team players & kept them motivated.• An accomplished Software Engineer specializing in Object Oriented Design & Analysis with an experience as a leader, as well as in the full life cycle of software design process including requirement definition, prototyping, design, implementation & testing.• Strong problem solver who can design solutions & propose various approaches for solution to the client.• Involved in appraisal process of individual team members & aware of grading/rating formalities. Was the member of technical expert's panel for recruitment.• Dedicated, self-motivated leader who is committed to success & adopt at multiple tasks in high pressure environments.• Motivated achiever with ~7 years of significant, progressive experience in information technology consulting, focusing Web-based, custom development projects as well as customization of packaged products.
Technical Skills	<ul style="list-style-type: none">• Programming Languages: Core Java (JDK1.6), UNIX shell, Autosys & SQL scripting.• Frameworks: MVC, Struts, Spring 2.0, Hibernate, DWR[Direct Web Remoting]• WEB Technologies: J2EE [Java Servlets, JSP, JDBC, Spring, Hibernate, Struts]• Scripting languages: AJAX, JavaScript and HTML4.0.• Development Tools: Eclipse3.1, Microsoft Visio, RapidSQL, Aquadata, Toad, Tectia Client, NetBeans, CVS, SVN, SCCS.• Database: Oracle 8i/9i, Sybase, MS-Access 98.• Web servers: PWS, JRun, Apache Tomcat.
Professional Experience	<p>Project Manager/Tech Lead, Wipro Technology Services Ltd, formerly, Citigroup Technology Services, Ltd. (April'07, Till Date.)</p> <p>Lead Developer, GlobeOp Financial Services, Ltd. (April'06 – April'07)</p> <p>Executive Engineer, Reliance InfoComm Ltd. (September'04 – April'06)</p>

<p>Education</p>	<p>2000 – 2004: B.Tech. (Computers) Dr.Babasaheb Ambedkar Technological University, Lonere-Raigad. Final year – 69%- First class with distinction. Aggregate- 68.75%- First class with distinction.</p> <p>Feb 2000: HSC (science) J.S.M. College, Alibaug. Mumbai University Marks: PCM-87% [Aggregate. 80%] Grade-I with Distinction.</p> <p>March 1998: SSC General Arunkumar Vaidya High School Alibaug Maharashtra state Board Marks: 84% Grade-I class with Distinction</p>
<p>Clients And Projects</p>	<p><u>Technical Manager, eSALES to AMC data migration-API development- Citigroup</u></p> <ul style="list-style-type: none"> • Consulted on 4 months project to develop a java based API to migrate existing database from Sybase to Oracle database including schema migration & data initialization. • Oversaw requirements gathering & responsible for design & actual coding/development of JAVA based API. • Proposed 2 different approaches to the client based on 2 variant designs. • Responsible for coding development of the selected design approach which was purely core JAVA API & JDBC API based application. • Also responsible for writing shell scripts which will be the entry point & used to invoke application developed in the previous step. • Extensively used JDBC 2.0 API & JDK 1.6 API <p><u>Technical Manager, Account Master Control (AMC) Repository Browser- Citigroup</u></p> <ul style="list-style-type: none"> • Project was a bunch of small development tasks which are apparently the part of a long term project. • Responsible for the development of Browser interface for metadata as well as accounts maintenance database schema. This included functional implementation using java classes as well as front-end changes in JSP. • Hands-on experience on writing action classes using JAVA & also for front-end look & feel related changes which involves CSS development. • Involved in the recruitment of entire team of 8 developers including 2 technical leads. • Responsible for coordinating with US clients for requirements gathering & analysis also preparing status reports which were provided to client on weekly basis. • Application is basically a web based application using Oracle database as the backend & JSP, struts were used for front-end/GUI development. Pure JDBC is used to interact with backend database. • I was also responsible for appraisal & annual ratings of entire team including immediate reporting & as level 2 Manager.

Technical Manager, CPI BridgeBack Engineering – Citigroup

- CPI is a mainframe system used by trading clients, existing bridge back process works in both directions to synchronize updates between eSALES & CPI.
- Old legacy system needed to be removed for performance as well as for licensing issue. New process is developed using core Java APIs (Collections, JDBC, Threading, Spring).
- Responsible for design, development & maintenance/support of the application. Involved in analysis & design of java app, writing shell scripts, stored procedures and Autosys jobs.
- Application development is sub-divided into 2 main processes viz. publisher & receiver, both processes are developed using java API.
- Monitor process is written shell scripts. Also, both above mentioned processes can be triggered (start/stop) using shell scripts via autosys jobs.
- Apart from the technical involvement in coding separate modules, I was involved in handling administration/management issues like internal conflicts amongst employees, keeping client informed about resignations, updating client on offshore activities & appraisals of employees.

Tech Lead, Equity Sales Application – CitiGroup

- Project involves the development of Accounts maintenance web application for Citigroup corporate customers.
- Involved in the design, development & maintenance of the application.
- Responsible for the development of web application including JSP/Servlets, Autosys jobs, sql scripting (Writing stored procedures for sybase database), pure JDBC & hibernate calls were used for interaction with backend sybase database.
- Independently developed an entire module based on Spring DWR technology which is AJAX for spring.
- Also, actively involved in Single-Sign-on implementation for existing eSALES application, which required updating all concerned java classes, JSPs & stored procedures.
- Accomplished several minor reporting jobs which uses java, sql & autosys scripting to generate daily/weekly reports requested by business.

Lead developer, TradePlus Reporting Tool – CitiGroup

- Development of Forex (New York, London) & Derivatives reporting tool based on scheduled jobs using Autosys scripting.
- The tool is basically designed to generate daily reports for the updates flowing from TradePlus to eSALES systems. Reports will be used by business on daily basis.
- Core Java APIs, Java XML binding using castor APIs & XL reports using POI libraries were used to accomplish the reporting processes.
- All updates flowing TradePlus systems were captured & after applying business logic reports were generated in XL sheets as per the criteria for new/old updates.

	<p><u>Developer, GoCredit – GlobeOp Financial Services</u></p> <ul style="list-style-type: none"> • Automatic Margin Transfer enhancement for UK clients • Responsible for the development of minor enhancements in existing GoCredit application. <p><u>Developer, GoProduction – GlobeOp Financial Services</u></p> <ul style="list-style-type: none"> • Application is developed to maintain the track of production releases as per the compliance within the organization. • Involved in the end to end development including requirements gathering, analysis, design, development & deployment in UAT. • Technologies used were Java/J2EE (JSP, Servlets and JDBC) and AJAX. • Involved in the development of a product which can be reused by other applications to implement Ajax which is based on predictive text based search algorithm. • Also, responsible for MVC based application which was using pure JDBC calls. <p><u>Developer, WDVPN Portal Development – Reliance Infocomm Ltd.</u></p> <ul style="list-style-type: none"> • Central application portal being used & referred by WDVPN (WirelessDataVPN users) for their BAU activities to interact with database & source information tool. • Involved in the design & development of the portal which includes database structuring, J2EE development using Servlets & JSP with Oracle as the backend database. • Table creation on Oracle schema & relationship mapping were accomplished independently.
<p>Competitive Examination/Achievements</p>	<ul style="list-style-type: none"> • <u>Star performer of the quarter – Q4 2009 – WTS.</u> For outstanding performance and the youngest project manager. • GATE (Graduate Aptitude Test in Engineering) Score: 97.60% [March-2003] All India Rank: 847
<p>Interests and activities</p>	<ul style="list-style-type: none"> • Web hosting: I host my own website. I write on my blog about the current affairs as well as about my personal views about life, relationships & emotions on my website (http://www.rahuldhmal.com). • Playing Cricket (District level), Carrom and listening music.
